February 2, 1981

Intel Corporation
365 East Middlefield Road
Mountain View, CA 94043**NEW RATES FOR SEWER SERVICE TO MAJOR INDUSTRIES**

Construction of the advanced wastewater treatment facilities at the Palo Alto Regional Water Quality Control Plant was completed in July 1980, and the new units are now in full operation. The completion of the treatment plant coincides with adjusted wastewater treatment charges which appear on the enclosed bill.

In accordance with federal and state regulations and revisions to the City Code adopted on November 13, 1979, industries discharging 25,000 gallons of wastewater per day or more are required to pay for the treatment plant operation and maintenance costs in proportion to the relative strength of industrial wastewater discharged to the sewer system.

Charges for sewer service to industries in the above category will be made starting with the enclosed billing on the basis of flow, chemical oxygen demand, suspended solids, and ammonia. Charges for your company through June 1981 will be based upon the following characteristics:

<u>FLOW</u>	<u>CHEMICAL OXYGEN DEMAND (COD)</u>	<u>SUSPENDED SOLIDS (SS)</u>	<u>AMMONIA (NH3)</u>
Monthly Water Use in Units of 100 Cubic Feet	16 mg/l	45 mg/l	3.4 mg/l

Based on these characteristics, your cost will be \$0.29 per 100 cubic feet (ccf) of water use according to the following unit costs:

<u>FLOW</u>	<u>CHEMICAL OXYGEN DEMAND (COD)</u>	<u>SUSPENDED SOLIDS (SS)</u>	<u>AMMONIA (NH3)</u>
\$0.27 per ccf	\$0.019 per ccf per 100 mg/l	\$0.030 per ccf per 100 mg/l	\$0.157 per ccf per 100 mg/l

In addition, the enclosed bill also includes an adjustment in the amount of \$18.08 for Account No. 90503080 and \$164.26 for Account No. 90503120 to cover the quality charges for the months since July 1980 for which you have already been billed the flow charge.

The Industrial Cost Recovery (ICR) requirements of the Federal Construction Grants Program intended to cover industry's share of construction costs, have been repealed by Public Law 96-403. Therefore, none of the ICR charges will be made to your industry, and none have been charged through and including this billing.

In July 1981, your rate will be recalculated based on the average results of samples collected last fall and next spring. If during this period, you should have a major change in the strength of your wastewater due to installation of pretreatment facilities or other process changes, please contact me to initiate special sampling and appropriate adjustments in your charges.

If you have any questions concerning the above charges, please telephone me at 966-6329.
